Component Grade and Comments	
<b>A. Implementation of Application</b>	
<b>User Interface and proper controls used for designing</b>	User Interface is complete but not separated and have proper use of controls
<b>Manual data entry or import from csv</b>	Data entry is proper with appropriate validation and use of proper datatypes and contains CRUD methods
<b>Data Validation</b>	missing most of the validation
<b>Enrollment Report &amp; weekly report in tabular format</b>	very poorly executed reports and data not shown accurately
<b>Course wise enrollment report &amp; Chart display</b>	any one component is missing or inappropriate data is shown
<b>Algorithm used for sorting &amp; proper sorting of data</b>	Default sorting provided by .net is used
<b>B. Documentation</b>	
<b>User Manual for running the application</b>	User Manual is good. Contains all varieties of forms.

<b>Application architecture &amp; description of the classes ad methods sued</b>	average work with very limited explanation of the classes and methods used
<b>Flow chart, algorithms and data sctructures used</b>	average work with very limited explanation and missing diagramatic representation.
<b>Reflective essay</b>	Average work with un clear learnings, experience or findings.

### C. Programming Style

<b>Clarity of code,Popper Naming convention &amp; comments</b>	Code is poorly written and lacks comments
<b>System Usability</b>	System can't be used and have issues

<b>Overall Grade:</b>	<b>B</b>	<b>B</b>
-----------------------	----------	----------

### Overall Comment:

Code should be self explainable with less comments. Need some proper naming of the component and require to add comments on required area.
In overall the code is working and all the functionality seems working and system can be used
