| Component Grade and Comments | |
|--|--|
| A. Implementation of Application | |
| User Interface and proper controls used for designing | missing controls in the interface |
| Manual data entry or import from csv | appropriate use of data types but missing some properties required or missing CRUD operation |
| Data Validation | Only basic validation |
| Enrollment Report & weekly report in tabular format | very poorly executed reports and data not shown accurately |
| Course wise enrollment report & Chart display | Very poorly designed and only contains one report format with in appropriate data |
| Algorithm used for sorting & proper sorting of data | Default sorting provided by .net is used |
| B. Documentation | |
| User Manual for running the application | User Manual is below average. Is textual only. |

| | |
|--|--|
| Application architecture & description of the classes ad methods sued | average work with very limited explanation of the classes and methods used |
| Flow chart, algoriathms and data sctructures used | average work with very limited explanation and missing diagramatic representation. |
| Reflective essay | Very poorly written |

C. Programming Style

| | |
|--|---|
| Clarity of code,Popper Naming convention & comments | very poorly written code and no comments at all |
| System Usability | very poorly developed application |

| | | |
|-----------------------|-----------|-----------|
| Overall Grade: | E+ | E+ |
|-----------------------|-----------|-----------|

Overall Comment:

| |
|--|
| Code should be self explainable with less comments. Need some proper naming of the component and require to add comments on required area. |
| In overall the code is working and all the functionality seems working and system can be used |
