| Component Grade and Comments | |
|--|--|
| A. Implementation of Application | |
| User Interface and proper controls used for designing | User Interface is complete but not separated and have proper use of controls |
| Manual data entry or import from csv | appropriate use of data types but missing some properties required or missing CRUD operation |
| Data Validation | missing most of the validation |
| Enrollment Report & weekly report in tabular format | very poorly executed reports and data not shown accurately |
| Course wise enrollment report & Chart display | Very poorly designed and only contains one report format with in appropriate data |
| Algorithm used for sorting & proper sorting of data | Default sorting provided by .net is used |
| B. Documentation | |
| User Manual for running the application | User Manual is below average. Is textual only. |

Marking Scheme

| | |
|--|--|
| Application architecture & description of the classes ad methods sued | average work with very limited explanation of the classes and methods used |
| Flow chart, algorithms and data sctructures used | average work with very limited explanation and missing diagramatic representation. |
| Reflective essay | Very poorly written |

C. Programming Style

| | |
|--|---|
| Clarity of code,Popper Naming convention & comments | very poorly written code and no comments at all |
| System Usability | very poorly developed application |

| | | |
|-----------------------|-----------|-----------|
| Overall Grade: | C+ | C+ |
|-----------------------|-----------|-----------|

Overall Comment:

Code should be self explainable with less comments. Need some proper naming of the componen and require to add comments on required area.

Good OK with the code. All feature implemented.
